# What is FMS?

*Fleet Management System: is a system for monitoring and tracking light vehicle fleets' movements and location. It provides asset management, routing and vehicle control with the goal of improving efficiency and reducing costs.*

Saferoad offers a diverse range of FMS solutions that are catered to the needs of clients and their fleets.

**FMS**

# The Need for FMS

## 1. Managing and Optimizing Fleets

*From tracking locations to monitoring actual working hours of your fleet, fleet management is the perfect tool to optimize your fleet and generate more profit.*

## 2. Enhancing ROI

*More control over fleets and advanced reports offer you the opportunity to reduce wasted hours and control operating costs.*

# FMS Benefits

*Our Fleet Management System solution is designed for increasing the efficiency of transport and truck fleets. FMS gives you the ability to:*

Obtain detailed usage reports covering accurate vehicle movement information, historical & and specific operating hours

Receive maintenance checks reminders to avoid breakdowns and extend vehicle lifespan

Monitor fuel consumption by keeping track of fuel levels to identify waste or theft

Monitor the vehicle's detailed itinerary for added control and knowing if a truck is being utilized for non-designated works

# Solution Features

## Enhanced Metrics:

- Real-time trip details in addition to historical data
- Driving behavior metrics
- Driver identification system

**Unlimited Accessibility:** Ability monitor your fleet anytime during the day via the Saferoad platform.

**Utilization Reports:** Extensive reports and analysis to view trip details and enhance efficiency.

**Alarms:** For a wide range of driving behaviors including excessive speeding, harsh braking, excessive acceleration and device tampering.

**Customizable Solution:** for fleets of all sizes

*Thank You*
